

## 4T-DLT Discord guide

*This document is a guide to best navigate the discord server and collaborate with the other players in the ecosystem on Distributed Ledger Technology. Discord is used as an informal discussion forum. Vetted and official standards and publications will only be found on the website directly.*

### Who can you access the 4T-DLT discord server?

You can easily access the discord server by clicking on this [link](#).

Few easy steps will help you to navigate:

1. Accept the invitation
2. Please select a username, email and password
3. You will need to accept the discord server rules to finish the creation of your account

### What are the server's rules?

- Keep conversation in English in order for everyone to feel included.
- No spam or self-promotion (server invites, advertisements etc)
- This is not a sales platform.
- Treat everyone with respect. Absolutely no harassment, witch hunting, sexism, racism or hate speech will be tolerated.
- Please use appropriate language when posting on the server
- Respect people's privacy: please use as much as possible the common channels to exchange with other community members
- If you see something against the rules or something that makes you feel unsafe, let the admin know. We want this server to be a welcoming space!

### What are the different roles in discord and what responsibilities do each role have?

Role	Responsibilities	Permissions
<b>Community Member</b> <i>Everyone enters the server as a "Community Member"</i>	All members can collaborate and exchange with the community	<ul style="list-style-type: none"> <li>● Read messages</li> <li>● Write posts</li> <li>● Comment in message threads</li> </ul>
<b>Shaper</b>	Specific members which are responsible of strategic decision-making	<ul style="list-style-type: none"> <li>● Read messages</li> <li>● Write posts</li> <li>● Comment in message threads</li> <li>● Have access to a private channel to discuss with other Shapers</li> </ul>
<b>Trusted Reviewer</b>	Special members which	<ul style="list-style-type: none"> <li>● Read messages</li> </ul>

	review content posted on the channel to regulate the quality on the server	<ul style="list-style-type: none"> <li>• Write posts</li> <li>• Comment in message threads</li> <li>• Manage messages and threads (authorised to delete messages)</li> <li>• Authorised to mute members</li> </ul>
<b>Admin</b>	Admins coordinate the discord channels, create new channels (when needed) and make special announcements	<ul style="list-style-type: none"> <li>• Read messages</li> <li>• Write posts</li> <li>• Comment in message threads</li> <li>• Manage messages and threads (authorised to delete messages)</li> <li>• Authorised to mute members</li> <li>• Manage the "Announcement" channel to inform the ecosystem on certain informations</li> <li>• Access to a private "moderator-only" channel where discord shares updates</li> </ul>

## What are the different channels in discord?

There are two distinct types of channels which you have access to on discord:

- **Written channels:** you can post messages here, comment to messages present in the thread, add a reaction to a message
- **Voice channels:** you can connect to talk with other members which are online

### Written channels

#### GENERAL

##### **Announcement**

The Management team will use this channel to make big announcements to all community members. Only admin are authorised to post on this channel.

##### **4t-dlt overview**

This channel gives the general information of the group. The starting point of the work around 4T-DLT is the whitepaper and CMTA repository. Further texts should be published that enable the establishment of a secure, reliable and regulated decentralised infrastructure.

##### **Meet community members**

This channel is where new members can publish a message about themselves for other members to get to know them better. Let other members know: who you are, where your expertise lies and what you wish to collaborate on.

##### **Future working document**

This channel is where members can post about future collaborative work opportunities. The Management Team will review the document and decide when it makes sense to start collaborating on the document. They will then create (if needed) a new channel on discord.

**Server structure wishes and feedback**

Members can post here any suggestions or feedback they might have concerning the discord server (e.g. need for a new channel)

**Shapers channel**

This channel is a private channel where Shapers can exchange together on the strategic decisions for the 4T-DLT initiative

**Website feedback**

This channel is used to comment on different functionalities from the website and share feedback with the team. We will then review the feedback and implement it accordingly.

**TECHNICAL DISCUSSION****Cmta standard tokenisation model**

This channel will be used to discuss CMTA repository and collaborative work.

CMTA token (CMTAT) is a framework enabling the tokenisation of securities in compliance with Swiss law. Here you also find direct access to the [Github repository](#).

**LEGAL DISCUSSION****T1-configuration**

This channel will cover any discussions on the trust pillar of configuration from the whitepaper.

**T2-consensus**

This channel will cover any discussions on the trust pillar of consensus from the whitepaper.

**T3-custody**

This channel will cover any discussions on the trust pillar of custody from the whitepaper.

**T4-transaction**

This channel will cover any discussions on the trust pillar of transaction from the whitepaper.

**Voice channels****General**

When you click on this channel you can easily share your screen or videos with other connected members. On this channel you can exchange orally with the community.

**Where can you find additional support?**

You can find easy support regarding discord on the [discord support page](#).

Beginner guide to discord can be found [here](#).

For any problems to access the 4T-DLT server, please contact [Jade Sternberg](#)
